

# UC Davis Research Brief: U.S. Department of Energy

UC Davis is a powerhouse for breakthroughs and impact.

## The Department of Energy

The U.S. Department of Energy (DOE) is a leading federal agency responsible for ensuring the nation's energy security, promoting energy efficiency, and supporting research and development in energy-related technologies. The DOE is also responsible for managing the nation's nuclear energy program and for conducting research and development in energy-related fields.

The DOE is a major source of funding for research and development in energy-related technologies, and it plays a key role in supporting the development of new energy technologies and the deployment of existing technologies.

The DOE is also responsible for managing the nation's nuclear energy program, and it plays a key role in supporting the development of new nuclear energy technologies and the deployment of existing technologies.

The DOE is also responsible for conducting research and development in energy-related fields, and it plays a key role in supporting the development of new energy technologies and the deployment of existing technologies.

The DOE is also responsible for managing the nation's nuclear energy program, and it plays a key role in supporting the development of new nuclear energy technologies and the deployment of existing technologies.
